## Notes

- Prices are for Linux, shared tenancy, On-Demand, and exclude tax.
- Monthly cost = hourly price x 730 hours.
- Storage is billed separately: an EBS gp3 volume costs USD 0.08 per GB-month, so the default 8 GB root volume adds USD 0.64 per month.
- A public IPv4 address costs USD 0.005 per hour (USD 3.65 per month).
- Burstable types (t2, t3, t3a, t4g) can incur extra charges for CPU credits when they run above their baseline in unlimited mode.

- Reference figures prepared for the A2Flow demo. Check the AWS pricing page before relying on them.
